

#8_beyond hope

Art project at the time of Covid-19

This painful global experience must leave us something.
So I thought of sharing short reflections on my work useful for the project of a better future in which to live. Because this challenge is ours. History tells us. Let's live it in the awareness of being the protagonists of the whole of humanity.

Maternità

2017 - 46x18 cm, h118 cm - stainless steel mirror finished by hands
Daniele Basso

"Maternità" is a thoughtful consideration on the passage from the condition of son to being parent. On the unavoidable and unpredictable multiply of points of view. On the change that in the silky elegance of female motherhood becomes evident beauty. It emphasizes the responsibilities of our actions and their consequences. It places the future at the center of our actions. It leads us to consider Teaching as an act of love and respect for Man and Life. This "Maternità" make contemporary an ancestral and universal symbol. It celebrate the splendid concreteness of everyday life, and transform common moments in rocks to hold on to solemnize the beauty of life itself
