Indomitable symbol of wild nature, it evokes the power of the creative force and the supernatural energy of the Absolute. In silence, the largest predator in the world, the marvelous tiger, suddenly throws itself forward. Instinct and courage are mixed with the reality in which elegance and beauty induce to all of us a deep respect. The tiger gives us an explosion of life and self confidence. Failure is not contemplated. Patient and optimistic, focused on the objectives, at the right time we grab them with confidence and explosive speed.
