## **MIRRORS OF PERCEPTION**

1st August 2024

*Exploring Nature, Identity, and Existence with Katrin Fridriks, Sebastiaan Knot, Johann Alexis, Daniele Basso, and Stevens Dossou-Yovo*

The exhibition "**Mirrors of Perception**" unites five visionary artists who explore the frontiers of abstraction, light, color, and metaphysical reflection through their captivating works.

Katrin Fridriks captures the essence of nature's dynamism and the velocity of life with her energetic and abstract paintings, reflecting the intersection of natural phenomena and abstract expression. Her works serve as mirrors, inviting viewers to contemplate the powerful forces of nature and their abstract representations.

Johann Alexis delves into the human condition with meditative abstract compositions characterized by geometric forms and rich textures. His works act as mirrors to the mind, reflecting the complexities of inner landscapes and cosmic connections. Alexis's art invites viewers to journey inward, exploring the interplay between personal introspection and the broader universe.

Daniele Basso's polished stainless steel sculptures serve as literal and metaphorical mirrors to contemporary society, probing the complexities of identity and temporality. His reflective surfaces encourage viewers to introspect and consider their roles within the shared human experience and the passage of time.

Stevens Dossou-Yovo's wall sculptures blend geometric precision with metaphysical depth, acting as mirrors that reflect timelessness and challenge perceptions of space. His works capture the ephemeral and the eternal in harmonious balance, prompting reflections on the nature of existence and the illusion of time.

Sebastiaan Knot masterfully manipulates light and color to create stunning geometric abstractions, transforming light into a tangible medium. His works serve as mirrors of perception, reflecting the intricate dynamics of hues and the play of light, offering a profound visual experience that invites contemplation on the nature of perception and the ever-changing quality of light.

This exhibition celebrates the diversity and innovation of contemporary art by showcasing five exceptional artists whose works redefine perception and abstraction. Each artist offers a unique perspective, highlighting the intricate complexities of the visual world through reflective art.
